Anchor Bracket for attaching chain and wire rope assemblies to speaker or structure

WLL 800 lbs. 7:1

WLL 575 lbs. 7:1

SIMPLE, EFFICIENT CONNECTIONS TO SPEAKER AND STRUCTURE

- Stronger than a shoulder eyebolt when load direction is off-axis with fastener
- Ideal for safety cable attachment to speaker (see illustration above)
- Accepts 3/8 inch or M10 metric screw sizes (easier to find than eyebolts with correct thread length)
- Excellent anchor for vertical concrete or wood surfaces
